

# WORKSHEET

Name \_\_\_\_\_

## STORY : **THE LITTLE RED HEN**

If you need help to answer the questions, go to [www.barry4kids.net](http://www.barry4kids.net) and learn about animals.

### Questions:

1. What is the environment in which the story takes place?
2. What bird is usually farmed for its eggs and meat?
3. Tell us the name of the animals appearing in this tale?
4. What is a moo?
5. What did the little red hen found when searching the ground?
6. Did her friends help her plant the seeds?
7. Once the wheat had grown tall, were did the little red hen take the golden stalks to?
8. What did the little red hen bake with the flour?
9. Why did the other animals come to the kitchen?
10. What are the main ingredients of bread?

### What is its name?

1. The animal I'm going to tell you about can be found domesticated or in the wild. The domesticated species is naked, blind and helpless at birth; it is raised for meat and for pelt. The wild species is hunted for meat. Both species feed on grass, forbs, leafy weeds, and dry bread. This animal loves carrots!

*What is the name of this animal?*

2. This question is about a domesticated bird usually raised for its eggs and delicious and nutritious meat. These animals are permitted to roam freely in the farmyard or in open-air pens and they feed on everything from meal leftovers to fruit or vegetable peelings, but they love scratching at the soil to search for seeds, insects, and worms.

*What is the name of this animal?*

3. Let's talk again about a mammal. Despite its reputation for dirtiness, this animal is very clean and, unlike many domestic animals, it is known for its intelligence. The upper part of its leg is dried and smoked after being salted and is then known as bacon. This animal's voice is the grunt and its female is called sow.

*What is the name of this animal?*

4. Now we are going to talk about a bird that loves water and lives there most of the time. This bird has short legs and webbed feet adapted for swimming. When born, this bird looks right away for a place with water, even a small ditch will do, but it prefers a lake! And it knows already how to swim; and since it has waterproof feathers, it does not get wet!

*What is the name of this animal?*

5. This mammal I'm now going to speak about is most certainly one of the most important farm animals. This animal is farmed for meat and leather, and it produces most of the milk people drink. With its milk, we can obtain cheese, butter, yogurt and other dairy products like cream. This animal's voice is the moo.

*What is the name of this animal?*

6. Still another very useful mammal to farmers for its wool and meat as well as for the delicious cheese produced with its milk. Its wool is usually used for making blankets and clothes, but cutting its wool off with scissors is not an easy task ; a lot of experience is required. To keep large numbers of these animals together, shepherds use dogs, the famous shepherd dogs.

*What is the name of this animal ?*

### **Fill in the missing words:**

1. Hens are raised mainly for their \_\_\_\_\_, which we use for baking delicious cakes.
2. The \_\_\_\_\_ is a bird that loves water. We find this bird in lakes, ponds and rivers ; this bird never gets wet because its feathers are \_\_\_\_\_.
3. Cheese, butter, yogurt and other dairy products are made with \_\_\_\_\_.
4. Sheep, goats and cattle are \_\_\_\_\_ because they feed on grass and have a peculiar way of digestion.
5. Animals like donkeys that graze on grass are called \_\_\_\_\_.
6. During the winter season, cows, oxen and horses are fed on \_\_\_\_\_.
7. Hens and ducks are \_\_\_\_\_ animals because they have a backbone; they belong to the \_\_\_\_\_ class.
